

The HTC One M9 gets the Goldfinger

Goldgenie have added another top phone to their long list of luxury customised smartphones. The London based premier Luxury Gift and Gold customisation specialist pioneered the art of Gold plating a mobile phone and are delighted to release a 24k Gold embellished version of the HTC One M9.

The latest smartphone from HTC boasts a beautiful ergonomically designed shape. Equipped with location smart premium software and a 20MP main camera, which has also been optimised for flawless light-filled selfies. A high resolution display of 1080 x 1920 pixels with a 441 ppi pixel density makes for optimal viewing and the audio quality is also one of the best offered by any smartphone on the market. Offering HTC BoomSound™ with Dolby Audio™ provides optimised sound, even from multi-channel online sources like YouTube and the phone delivers true left and right channel sound for a cinematic experience.

Laban Roomes, CEO and Founder of Goldgenie Global stated, "I've dealt with a lot of phones in my time and was extremely impressed with HTC's latest offering. Its high speed processor and front and back cameras are excellent and it just feels great to hold in your hand and of course it had to get the Midas Touch treatment".

Gleaming with a lustrous layer of genuine 24k Gold, Goldgenie's luxury customised version of the HTC One M9 is a stunning fusion of modern technology with traditional luxury craftsmanship. The phone is presented in a cherry oak jewellery box and may be laser engraved with a symbol or name to add personal sentiment to the device, making it the perfect gift for Android users.
